Be SMART

Innovative Long-Lifecycle Memory Supplier News

SMARTsemi ™

Word from the Top

Welcome to the inaugural issue of Be Smart, the smartest way to stay on top of today's memory market and how SMARTsemi is making a difference for you.

It's been about 6 months since we launched, and many of our customers ask what motivated us to start. Our leadership team has been immersed in the semiconductor market for decades. The skills we've learned, processes we've established, and people and plants we've invested in have a singular focus – you. We understand your product requirements and lifecycles to anticipate your needs.

SMARTsemi was built to deliver exemplary products with unique processing and services. We'll provide the mainstream as well as the products that are hard to find, and when you need them most. We are a partner at your side, whether at the launch of your next product, ramping up through volume, or ensuring continuity of supply until the end. We'll continue to use our decades of experience and relationships with *our* supply chain to make us the strongest link in *your* supply chain. Join with us today!

Product Updates

SMARTsemi processes over 150million memory components annually and develops custom packaging and testing in our global semiconductor design and manufacturing facilities. Our 20+ year partnership with Tier-1 device OEMs gives you a supply advantage regardless of market conditions. We're working around the clock to expand our **component catalog** and have constructed an easy-to-use **component search engine**. Check out our current offerings.

Events

Join us this Spring at these **events**.

Sea-Air-Space

National Harbor, MD

Gaylord Nation Resort & Convention Center

SMART Modular Technologies Booth #657

Join us at the SMART Modular Technologies Booth 657 during the largest maritime expo in the U.S. and learn about our memory component solutions for defense industry.

Apr. 3-5, 2023

XPONENTIAL 2023

Denver, CO

The Colorado Convention Center

SMART Modular Technologies Booth #3122

Join us at the SMART Modular Technologies Booth3122 during the industry's highest impact event for intelligent industrial machines and learn about our memory component solutions for the robotics.

May 8-11, 2023
